

Patient Consent for Electronic Prescribing

Ethos Clinics has implemented e-prescribing as part of an on-going effort to improve your health care. It is a system used to submit prescriptions electronically to the pharmacy of your choice. E-prescribing creates a more efficient and safer process for patients to access their medication. It helps to prevent, and in some cases eliminate, the top reasons for prescription errors - including illegible handwriting, incorrect dosing, and missed drug/allergy interactions. This improves patient care and safety, and decreases medication errors.

E-prescribing systems also store and transmit your prescription information with medication history to your health care providers and insurers. This allows for information to be obtained quickly about the drugs covered under your benefit plan, as well as the drugs you may already be taking to minimize adverse drug events.

By signing below, you provide your consent for Ethos Clinics and its providers to electronically submit your prescriptions through the e-prescribing system described above. You also are also consenting for your provider to request and use your prescription medication history, from other healthcare providers and/or third party pharmacy benefit payors, for treatment purposes.

This consent will remain in effect until you withdraw it. You may withdraw at any time except to the extent it has already been relied upon. Your decision not to sign this form will not affect your ability to receive medical care, or your ability to receive your prescriptions through alternative means.
